

iNspire Innovative Service with New Trend

Official Activated Platform
of Library Service

About IDSmart

MiTAC Information Technology Corporation is the principal member of the MiTAC-SYNNEX Group. The MiTAC-SYNNEX Group, with its first foundations laid in 1974. In 2015, Claridy Solutions, Inc. become to a part of MiTAC Information Technology Corporation. The research and development team members of ClarIDy Solutions are over one hundred employees. By integrating all the key technologies, resources and management competence in place, we successfully developed a series of products under our own brand, **IDSmart™**, we commit to our clients for the best service and high-quality product. ClarIDy Solutions now is the RFID expert to apply its RFID application in both hardware and software to RFID Intelligent library System.

To meet the evolving needs of users in the rapidly changing research and learning environments, and to achieve greater efficiency, libraries are looking for new paradigms to deliver advanced and compact new services to users.

● The New-Generation Library Services Platform

Integration

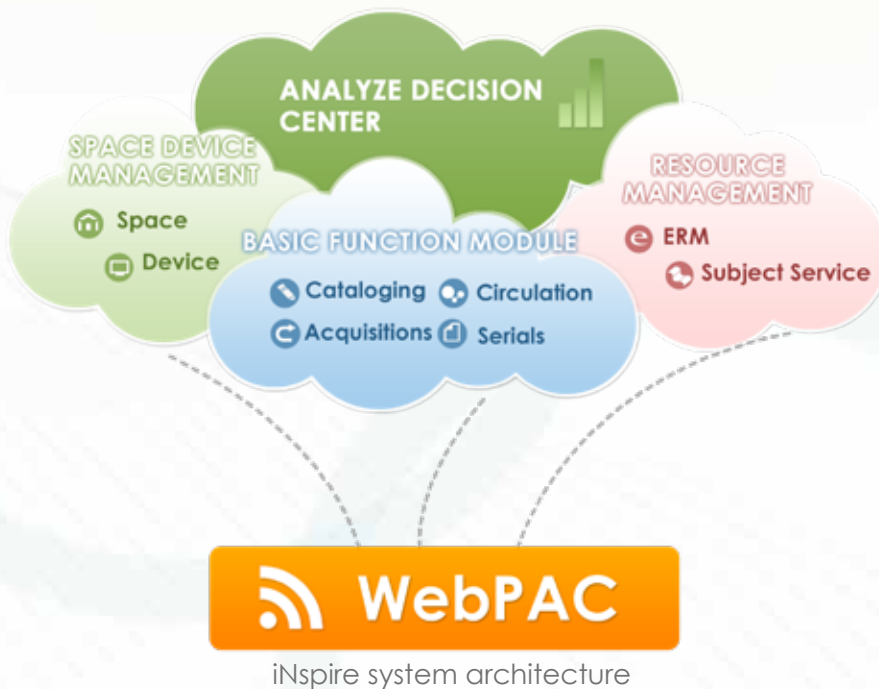

iNspire unifies the disparate systems today's libraries manage for electronic, and print resources

Optimize

iNspire redirects resources to focus on extending library services within and outside their institutions in direct support of teaching and research goals.

Connection

iNspire APIs provide customization of services to give libraries better ways to connect their operations with their patrons.

● iNspire Extend and Energize your Library

Unified Resource Management

iNspire supports the entire suite of library operations for print, and electronic resources.

Flexibility

iNspire simplifies library workflows by using a unique automated business processes and shared data.

Cloud-based Solution

Offered as a cloud service to increase the return on investment and reduce the total cost of ownership of the library's infrastructure, and to provide access to shared data and services

Open Platform

Using web-based, open interfaces, iNspire can be integrated seamlessly with other systems including external campus systems, and libraries can develop adapters and plug-ins to meet their institutions' unique needs.
